

New Rooftop Air Conditioner From Webasto

Cool Top Trail 28: compact high-performer for motorhomes and caravans

Gilching – April 4, 2022 – Thermomanagement expert Webasto is expanding its range of rooftop air conditioners for caravans and motorhomes with its new Cool Top Trail 28. The model offers a cooling capacity of 2.8 kilowatts and is suitable for vehicles of up to 8.5 meters in length. It is extremely compact with external dimensions of 85.5 x 65.7 x 21.5 centimeters (L x W x H), allowing flexible installation on the vehicle's roof. The unit's housing is made of UV-stabilized polypropylene, making it extremely robust yet lightweight, at just 35.5 kilograms.

The unit is impressively efficient thanks to the generously dimensioned heat exchangers, as the high cooling capacity is delivered at a low current consumption of only five amps. An additional heat pump function also allows it to output up to 2.6 kilowatts of heat. Alongside cooling and heating the unit offers several additional features like dehumidification, timer and sleep functions.

The Cool Top Trail 28 fits in perfectly with Webasto's range of rooftop air conditioners. In addition to the new unit, systems already exist with cooling capacities of 2.0, 2.4, 3.4 and 3.5 kilowatts. This allows everyone to select the optimum capacity for their vehicle size and the temperatures in their preferred travel region.

Originally developed for Australia's hot climate, these parking coolers reliably deliver greater comfort for the whole interior of a motorhome or caravan. All Cool Top Trail air conditioning units have a wide range of applications for outdoor temperatures between -5 and +50 degrees Celsius. They are especially quiet, allowing them to provide a pleasant temperature and calm environment – not only at night.

The air conditioning units are supplied with a mounting frame for roof apertures of 40 x 40 centimeters. This means that they fit precisely into existing rooflight cut-outs, which are normally exactly this size. An alternative adapter frame is available as an accessory for use of smaller 36 x 36 centimeter cut-outs.

An easy-to-use remote control allows all of the air conditioning unit functions to be accessed from the dining area, seat or bed. Air distribution can be modified as required by setting the outlet louvers correspondingly.

The Cool Top Trail will be available from June 2022 at a price of 2,343 euro (RRP).

About Webasto

The Webasto Group is a global innovative systems partner to the mobility industry and one of the 100 largest suppliers to the automotive sector worldwide. The company's offering includes in-house developed roof, heating and cooling systems for various types of vehicles, batteries and charging solutions for hybrid and electric vehicles, and additional services related to thermal management and electromobility. Among the customers of Webasto are manufacturers of passenger cars, commercial vehicles and boats, as well as dealers and end customers. In 2020, the Group generated sales of around 3.3 billion euros and employed more than 14,000 people at over 50 locations. The headquarters of the company, which was founded in 1901, is located in Stockdorf near Munich (Germany). For more information please visit www.webasto-group.com.
