Engine pre-heat and interior heat
Designed to provide engine pre-heat and interior heat in one unit, the DBW 2010 can do it all with 45,000 btu/h heat output. The DBW 2010 draws in cold engine coolant, then heats it and pumps it back to the vehicle’s engine and HVAC system. The result is a pre-heated engine and warm interior. In extreme climates, you can also use the DBW 2010 with additional accessories to warm the fuel and keep it from gelling.
